OverviewThe company began as Computer Solutions back in 1991 as a part-time supplemental income producer. My services, at that time, were mostly installation, repairs, upgrading and networking. Over the years that followed, the business went thru several transitions until now, Computer Solutions became Dr. Fix-It Computer Center servicing Suffolk County Long Island and many surrounding areas. The development of the company website, WWW.DRFIXITLI.NET, has increased the company's business market greatly
