OverviewThe name behind the brand: Luiza's story begins with her nomad lifestyle. Since childhood, she has been changing her surroundings, forced by various circumstances to move from the seaside to the mountains, and from various areas of a crowded capital city in Europe, to the currently sunny Florida, by the ocean. This constant change naturally led her to try and turn every object - be it clothes, accessories, furniture or anything one could carry around from one home to another - into something
