OverviewWe create full-sized film negatives for contact printing from your digital photos ! Creating a high quality negative from a digital image for use in the darkroom has proven very difficult. Some people have achieved excellent results using high resolution printers on transparency film for platinum prints. But if you want to make traditional black and white contact prints in your darkroom on silver gelatin paper then you have probably found those digital printer negatives less than satisfactory

AddressSilver Digital Negative Photography is located in 19726 Sweetgum Forest Court, Humble, TX, 77346
