

Crosstown Engineering

3960 Park Lane Dallas, TX
75220

Phone: (469) 751-7694

Our structural engineers are objective and professional civil engineering design experts and investigators for residential and commercial developers and for residential forensic analysis and performance clientele. Our engineering consultants study all documentation, perform detailed on-site inquiries and provide clear observations, facts and conclusions to what's in question. Our engineering reports are delivered in a timely manner as part of our industry-standard engineering.
